# KARAKTERISTIKE

## VARNOST JE KLJUČNEGA POMENA

Tuš kabine Delta SPA LEGO so izdelane iz varnostnega kaljenega stekla, ki je ključnega pomena za zagotavljanje varnosti uporabnika med tuširanjem.

**Varnostno kaljeno steklo** je posebna vrsta stekla, ki je obdelano s postopkom kaljenja, da postane bolj odporno na udarce, pritiske in toplotne spremembe.

**Večja trdnost:** Varnostno kaljeno steklo je približno petkrat močnejše od običajnega stekla iste debeline. To pomeni, da je odpornejše na udarce, udarce in pritiske.

**Zlom stekla:** Če varnostno kaljeno steklo vendarle razpade, se razbije na majhne drobce z zaobljenimi robovi in ne na velike in ostro oblikovane robove stekla. To zmanjšuje tveganje za poškodbe v primeru zloma.

**Odpornost na praske:** Čeprav ni neuničljivo, je kaljeno steklo odpornejše proti praskam kot običajno steklo.

**Enostavno čiščenje:** Varnostno kaljeno steklo je enostavno čistiti in vzdrževati.

---

## TUŠ VRATA LEGO NA TEČAJE

Tuš vrata LEGO imajo mehanizem s tečaji, kar omogoča da se vrata odpirajo in zapirajo okoli osi tečaja, podobno kot običajna vrata v notranjih prostorih. Vrata s tečaji s svojimi značilnostmi predstavljajo veliko prednosti, kot na primer možnost odpiranja navznoter ali navzven.

Obenem pa je mehanizem s tečaji enostaven za vzdrževanje, saj je tečaj vkomponiran v celotno dolžino stekla in profila in tako ne prihaja do povešanja vrat/stekla.

## OKOVJE IN PROFILI

Pri tuš kabina Delta SPA LEGO so izbrani kakovostni in trajnostni materiali, ki zagotavljajo stabilnost in trdnost tuš kabine. Profili in okovje so izdelani iz aluminijastih profilov, ki se uporabljajo kot strukturna komponenta za ojačitev in stabilnost. Zaradi svojih lastnosti so odlična kombinacija z varnostnim steklom tuš kabin Delta SPA LEGO.

**Stabilnost in trdnost:** Aluminijasti profili dodajajo stabilnost in trdnost tuš kabini. Zagotavljajo okvir, ki podpira steklene stene ali vrata ter preprečuje nihanje in gibanje med uporabo.

**Odpornost proti koroziji:** Aluminij je odporen na korozijo, kar je pomembno v vlažnem okolju kopalnice. Ne bo rjavil ali izgubil svojih lastnosti zaradi vlažnega okolja.

**Majhna teža:** Aluminij je lahek material, kar olajša prevoz in montažo tuš kabine. Hkrati pa je dovolj trden za zagotavljanje stabilnosti.

**Trajnost:** Aluminijasti profili so trajni. Brez večjih obremenitev se ne bodo poškodovali ali obrabili.

---

## STENSKI PROFIL

Stenski profil je nastavljiv po širini do 2,5 cm, kar omogoča popolno prilagoditev prostoru in vključuje pokrivno ploščico, ki preprečuje stekanje vode v profil.

**Enostavno čiščenje:** Aluminijasti profili so enostavni za čiščenje in vzdrževanje, kar olajša ohranjanje videza tuš kabine.

## ZAPIRANJE IN TESNENJE

Zapiranje in tesnenje tuš kabin je ključnega pomena za preprečevanje uhajanja vode iz kabine ter ohranjanje kopalnice suhe in varne. Pravilno zapiranje in tesnjenje sta pomembna za udobno in brezskrbno uporabo tuš kabine.

**Vrata in profili:** Tuš kabine LEGO imajo steklena vrata s tečaji vgrajenimi v celotno dolžino profila, kar preprečuje povešanje vrat.

**Tesnila in pravilna namestitvev:** Tesnila so ključna za preprečevanje uhajanja vode. Tuš kabine LEGO imajo magnetna tesnila, ki so nameščena na celotno dolžino vrat in fiksnega stekla in tako preprečujejo izliv vode na vratih. Obenem uhajanje na dnu vrat preprečuje tudi tesnilo na dnu vrat. Tesnila so prožna in se dobro prilagodijo in preprečijo, da bi voda uhajala. Ključnega pomena je, da so vrata in profili poravnani, s čimer se zagotovi tesno zapiranje vrat in posledično prepreči uhajanje vode.

**Periodično vzdrževanje:** Tesnila se sčasoma obrabijo, zato je pomembno redno vzdrževanje in čiščenje. Pri tuš kabinah Delta SPA LEGO so vsi rezervni deli zagotovljeni.

## ROČAJ

Podolgovat ročaj na vratih predstavlja elegantno in funkcionalno dopolnitev vrat Lego. Izdelan je z mislijo na udobje in estetiko, saj zagotavlja enostavno odpiranje in zapiranje vrat ter hkrati dopolnjuje videz vašega prostora. Njegova kakovostna izdelava iz trpežnih materialov zagotavlja dolgo življenjsko dobo in brezskrbno uporabo.

Ročaj lahko služi tudi kot držalo za brisače.

# STABILIZATORJI

Izbirate lahko kar med 3 različnimi tipi stabilizatorjev – montaža vzporedno z vrati, montaža pravokotno na vrata ter montaža v strop (stropni stabilizator). Izbira stabilizatorja je lahko estetske (kar kupca vizualno bolj pritegne) ali funkcionalne narave.

## MONTAŽA PRAVOKOTNO NA VRATA

V kompletu je vključen stabilizator, ki se montira pravokotno na vrata, v dolžini 100 cm.

## MONTAŽA VZPOREDNO Z VRATI

Pri manjših tuš kabinah je funkcionalnejša postavitvev stabilizatorja vzporedno z vrati, saj tako ne moti tuš rože. Stabilizator se kombinira s stabilizatorjem, ki se v osnovi montira pravokotno na vrata in tako pridobimo skupno dolžino do 170 cm.

## STROPNI STABILIZATOR

V določenih primerih (npr. okno v tušu) montaža stabilizatorja v steno ni možna in takrat težavo lahko rešimo s stropnim stabilizatorjem. Stabilizator je dolžine 80 cm in ga je možno rezati na dolžino. Primeren je za steklo debeline 6 ali 8 mm.

6mm

Tuš kabine so narejene iz kakovostnega kaljenega varnostnega stekla debeline 6 mm.

200cm

Višina tuš kabine je 200 cm.

Zaradi širokega nabora dimenzij, tuš kabine Lego ustrezajo vsakemu prostoru. Širina fiksne stranice je 70, 80, 90, 100 ali 120 cm, dolžina tuš kabine pa je v razponu od 80 do 170 cm.

Vrata tuš kabine lahko namestite tako, da se odpirajo navznoter ali navzven, kar ima 2 prednosti. Pri odpiranju navznoter kapljice, ki polzijo po tuš vratih, padajo na tuš kad in s tem ohranite suha tla kopalnice. Odpiranje navznoter je praktično tudi pri majhnih kopalnicah, saj s tem prihranite prostor.

Prilagodljivi stenski profili omogočajo montažo kabine v skoraj vsak prostor, saj z njimi lahko kabino razširimo ali zožamo do +/- 5 cm.

Zapiranje vrat z magnetnimi tesnili.

Tuš kabine imajo pod vrati spodnji aluminijasti profil, ki preprečuje iztekanje vode.

Modularni sistem montaže, kar pomeni levo ali desno postavitev tuš vrat.

AL

Aluminijasti profili so na voljo v krom, črni mat in zlati barvi, pri čemer so v zlati barvi na voljo le določene dimenzije.

Ročaj na vratih je moderne oblike in lahko služi tudi kot držalo za brisače.

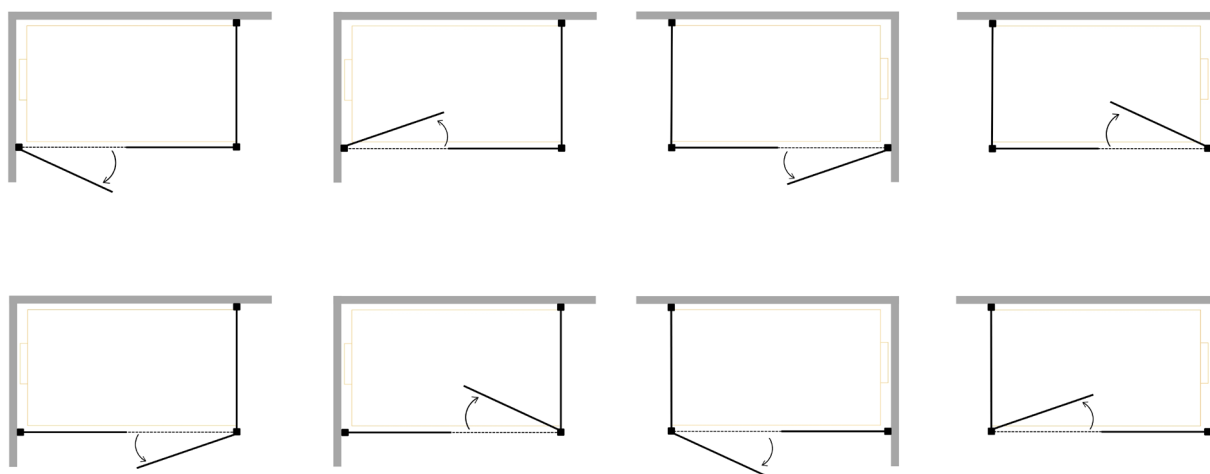

Vse tuš kabine vsebujejo stabilizator.

Zaključni detajli so vključeni v kompletu.

Tuš kadi Delta SPA Stone lahko zaradi nizke vgradne višine, katera meri le 2,5 cm, vgradite na različne načine:

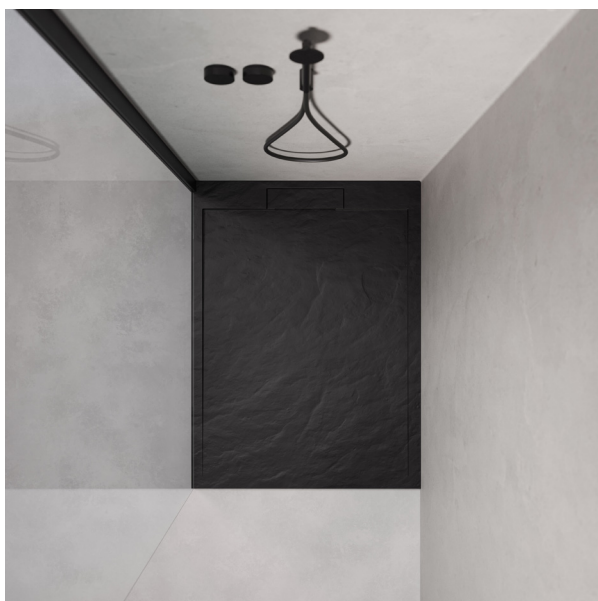

- vgradnja na tlak – ploščice do tuš kadi (rob)
- vgradnja v tlak z nivojem s talno keramiko (ravna površina celotne kopalnice)
- na ploščice – potrebna ustrezna priprava sifona na pravilno pozicijo
- vgradnja v tlak: takšna vgradnja je varnejša za uporabo, poveča se funkcionalni prostor v kopalnici in omogoča lažji dostop za gibalno ovirane osebe

## REZANJE PO MERI

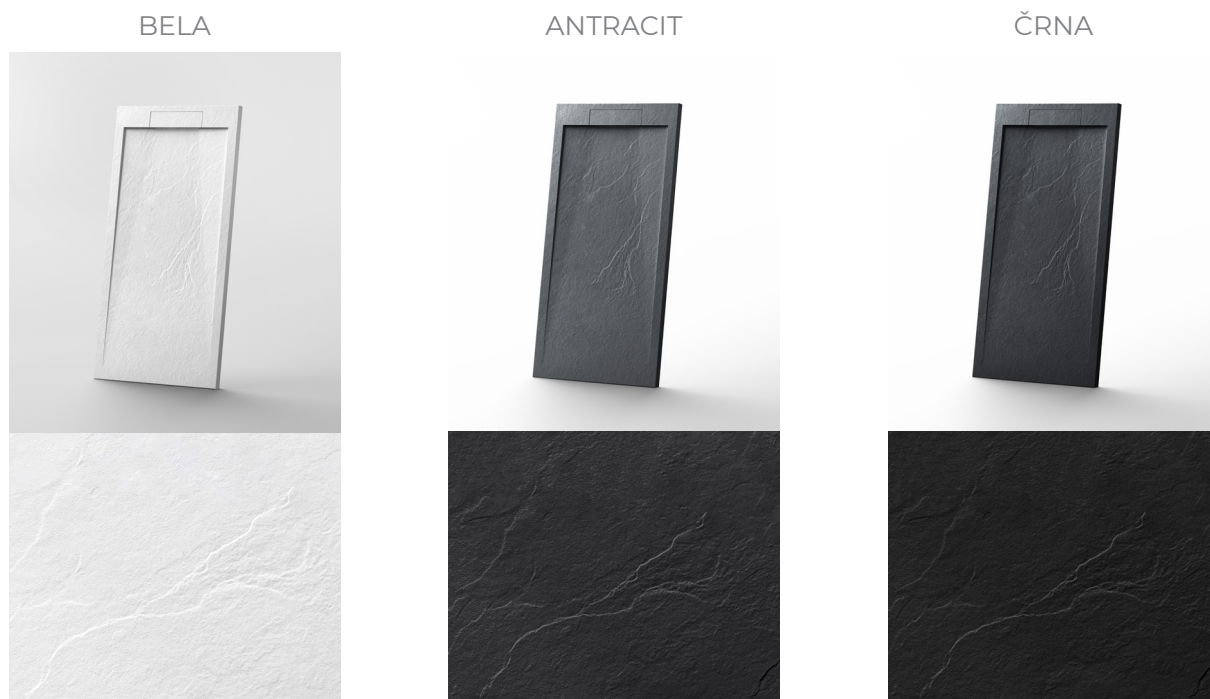

**Tuš kadi Stone** so na voljo v več standardnih dimenzijah. Njihova prednost je možnost rezanja na dimenzijo po meri, kar lahko izvede strokovno usposobljena oseba (keramičar, inštalater). Rezanje je možno po dolžini in širini, kar omogoča prilagoditev vsakemu prostoru in reši marsikatero arhitekturno oviro.

Vgradnja je mogoča v nišo, kot ali na eno steno kopalnice, saj je iz vseh 4 strani obdelana v svoji strukturi materiala.
