BATH ACCESSORIES — MADE TO LAST FOREVER

kapi⚓an

Made in the EU from stainless steel

MADE
IN THE

ISO 9001
ISO 14001

In the creation and development of our brand, **Kapitan**, we took on two challenges for ourselves:

1. The manufacturing process

We devised technology that would allow us to manufacture high-quality products more quickly in order to have **the best price-quality relationship**.

2. The material, stainless steel INOX 18/10 304

Though stainless steel is exceptionally difficult to work with, we have dedicated ourselves to overcoming this challenge, as **it lasts practically forever** under the harshest of conditions. Even when exposed to the salty, wet sea air, it maintains its structural integrity. That is why all luxury yacht accessories are made of stainless steel. And also, stainless steel does not require any decorative plating (like *galvanization**). In other words, what you see is what you get - which is also our philosophy!

20 years guarantee on the material —

INOX
18/10

— **stainless steel** chrome 16 - 18 % + nickel 8 - 10 %

Stainless steel lasts forever because it forms a natural protective layer without plating that restores itself when damaged.

The chrome in stainless steel forms an invisible layer of oxide that protects the steel from corrosion, when it comes into contact with the oxygen in the air. When compromised, this layer is quickly restored.

The nickel allows the steel to shine like a mirror and gives it further strength.

Working with stainless steel 18/10* may be demanding, but its strength, anti-corrosive, and anti-bacterial properties make it second to none in certain demanding settings: public baths and toilets, kindergartens, medical facilities, restaurants, and hotels.

powder coated stainless steel

Powder coating is a dry finishing process that uses finely ground particles of pigment and resin that are electrostatically charged and sprayed onto electrically grounded parts. The charged powder particles adhere to the part and are held there until melted and fused into a uniform coating in a curing oven.

Long-lasting – powder coating can maintain its finish up to 15 to 20 years. Its resistance to weather, corrosion, and chemicals makes powder coating a more durable finish than paint or other liquid coatings. Powder coating is resistant to chipping, scratching, and other wear because of the thermal bonding it undergoes during curing.

Eco friendly – Unlike *galvanization**, environmentally friendly powder coating contains no heavy metals, such as lead and cadmium. Powder coating does not produce any hazardous wastes as by-products of the process.

**galvanization* = decorative plating. The chemicals used can damage the health of those involved in this process, as well as the environment.

OPTIMO black – The combination of matt black enriches stainless steel in the spirit of industrial design.

OPTIMO white – gentle blend of soft white and stainless steel give the bathroom a clean and zen-like atmosphere.

ABS (Acrylonitrile Butadiene Styrene) is characterized by its impact-resistance, strength and elasticity, heat- and chemical resistance.

installation with dowels

Our fixtures and accessories, with their patented Kapitan base, allow for classic installation and are packed with all dowels and stainless steel screws needed. One shortcoming to this type of installation is that it requires special instruments and skills.

video instructions on classic installation or installation ↓ using 3M VHB: www.kapitan.bg/installation_guide.html

There exists the risk of drilling into electrical wiring or a pipe, as well as breaking a tile.

The mounting surface should be perfectly clean with NO traces of dust or grease upon it.

patented retainer bases

Polycarbonate+acrylonitrile-butadiene-styrene (PC+ABS) provide excellent impact resistance, heat resistance, and outstanding aesthetics.

de-installation

Should you choose to change the fixture's position on the wall, simply unscrew and remove it. **Any holes in the wall will remain, of course.**

VHB

with tape

Kapitan makes it easy for you to install your own bathroom fixtures – with long-lasting effect using extraordinarily strong acrylic foam adhesive, 3M VHB Tape – without any hardware, without drilling into the tiles of your new bathroom, and without having to invite construction workers into your home!

clear

dust, rust, fat.

20 09
for clean surfaces

prepare

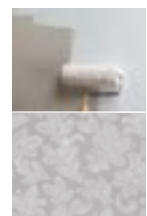

relief tiles with primer for greater adhesion

20 19
3M Primer 94

don't use

on paint, veneer, wallpaper, laminate.

Should you choose to change where your fixture is located, simply use a knife to slice into the tape from the side. Once the fixture has been removed, any remains of the tape can be cleaned off leaving **no trace on the tiles!**

Our bathroom accessories are made of stainless steel containing 16-18% chromium and 8-10% nickel. The standardized name of the popular steel name 18/10 is Grade 304. The content of chromium determines its resistance to corrosion. The added nickel allows polishing to a mirror shine, improves corrosion resistance at high temperatures and adds durability. This type of steel is often used for making utensils (e.g. pots, platters) and instruments of the highest quality and durability. Stainless can be called steel with at least 10.5% chromium-free while in 304 chrome is 16 to 18%. In contact with oxygen in the air, the chromium becomes chromium oxide, thus forming an invisible layer that protects the steel from rusting. If this layer is damaged, it quickly regenerates again.

guarantee 20 years

These qualities of stainless steel and ancillary materials that we use give our bathroom accessories strength and durability in time. These are the reasons why we give them this warranty.

ISO 9001

ISO 14001

Our bathroom accessories are manufactured to standards that ensure the highest strength and durability in wet environments. The accessories are made of 100% corrosion-resistant materials: stainless steel 304 and first use (no recycled) ABS and polyethylene purchased from leading manufacturers, with guaranteed quality and composition. You can get the quality certificates of the materials we use into your desired format by calling us on the phone. We are ISO 9001 and ISO 14 000 certified.

Our warranty and liability for the quality of this product is executed through replacement or repair of parts or accessories. The accessories have to used for their purpose for the time of their normal and regular operation and use. Do no use any abrasive materials or anything but regular soap solutions for their cleaning and maintenance.
